Skills

I am a Full-Stack Engineer with experience building new products through the entire development lifecycle. While I mostly develop with React, Node/Express, and JavaScript/HTML/CSS, I have also worked with TypeScript, Python, React Native, and several other languages and frameworks. My strengths include strong problem solving skills, a collaborative mindset, and the ability to learn and grow very quickly.

Experience

Signs365 (SunSh1n3 Studios) / Software Engineer

March 2020 - Present, Shelby Township, Mi

- Developed e-commerce websites for various subsidiary businesses using React on the frontend and Node/Express/MongoDB on the backend.
- Refactored monolithic codebases into more manageable, module-based microservices using Swagger/OpenAPI.
- Discovered and explored potential new technologies to improve efficiency and solve technical problems.
- Worked closely with designers, project managers, and other developers to plan, optimize, and improve projects at every stage of development.

Open Source Election Technology Foundation/ Web Developer

2019 - 2020

- Created informational websites using HTML and CSS
 - Tested websites and performed troubleshooting prior to deployment
 - Optimized WordPress web assets for speed and SEO
-

Education

FreeCodeCamp.org / Full Stack Web Developer Certification

2019

FCC is an online curriculum that guides users through hundreds of hours of learning and building projects using HTML, CSS, and JavaScript, eventually moving on to other libraries and frameworks such as React, Node, and Express.
